Commissioner of Patents

1. The proposed reply filed on 10-16-00 is not responsive to the prior Office action because of the following omission(s) or matter(s): the amendment to the claims constitutes a change of invention for the following reasons. The previous claims were examined in light of applicants amendment to recite an oligosaccharide portion of a ganglioside conjugated through a ceramide-derived carbon thus requiring a portion of the ganglioside to be present. The previous claims were considered in light of this specific linkage and the presence of the ganglioside. The now claimed invention does not require that any part of the ceramide portion of the ganglioside or the ganglioside to be present and has apparently changed the linkage. The presently claimed invention, provided by applicants amendment does not reflect gangliosides or linkage through ceramide-derived carbons. Since, Applicants have already received an action on the merits for a different claimed invention (linking the oligosaccharide portion of a ganglioside conjugated through a ceramide-derived carbon), the amended claims drawn to any oligosaccharide conjugated to Keyhole Limpet Hemocyanin constitutes a change of invention. Such changes in invention are not permissible mid-prosecution.

Since the above mentioned reply appears to be *bona fide*, applicant is given a TIME PERIOD of **ONE** (1) **MONTH or THIRTY (30) DAYS** from the mailing date of this notice, whichever is longer, within which to supply the omission or correction in order to avoid abandonment. EXTENSIONS OF THIS TIME LIMIT MAY BE GRANTED UNDER 37 CFR 1.136(a).
